Test Case

Test Case ID: Banqo_05	Test Designed by: kritomas
Test Name: Test money transfer	
Brief description: Test money transfer between two accounts	
Pre-conditions: The database must already be ready (Test Banqo_01), two accounts must already be opened	
Dependencies and Requirements: Test Banqo_01, two accounts	

Step	Test Steps	Test Data	Expected Result	Notes
1	Open the application, navigate into the transaction mode	doc/USAGE.md	The prompt switches to "transaction: "	
2	Transfer money between two accounts with the "transfer" command		You will get a notice about the sender's balance before and after the transfer. The notice will show the same or different balances depending on your config. The transfer should occur regardless	You may need to query the "list" command in account mode to get the necessary account numbers
3	Verify, that the transaction happened with the "list" command		There will be a new transaction	
4	Verify, that the accounts' balances changed with the "list" command in		The account balances will be changed
